

# CoreFour

## Sprint 9 Ceremony

(November 23, 2025 – November 29, 2025)

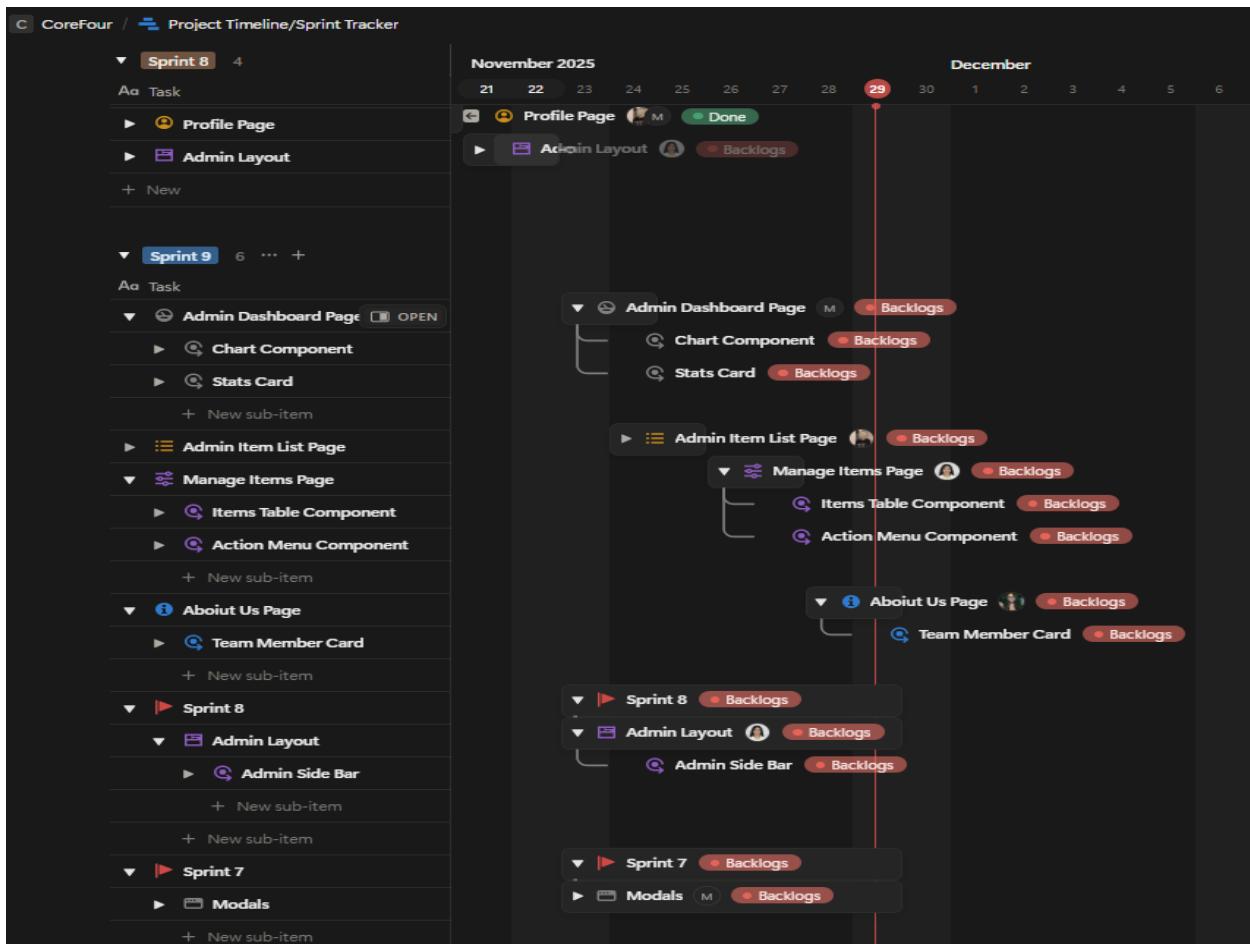

### Sprint Planning / Progress Update

Sprint 9 Progress Percentage (0/6):

0%

Overall Project Percentage (24/42):

57%

Our sprint 9 focused on setting up our VPS Hostinger subdomain for development and polishing the codes that is in the main branch even before setting up our staging and deployment. The features we have polished so far is the authentication including the register uniqueness validation and implementing of log out, the filter of the Item List Pages, and the UI of the Homepage, and the connection of the report pages with the backend. In the backend, we created the API for uploading images.

Our tester focused on learning and implementing the GitHub Actions for Automatic Coding Review Based on coding guidelines.

We had face blockers in this sprint, our time was consumed by the shooting of our CSID project in Multimedia which hinders us to make that much of a progress.

## Sprint Retrospective

### **What went well:**

- Successfully set the sub domain in VPS Hostinger for our testing in the develop branch
- We are able to fully implement the authentication with updated uniqueness validator
- Finished the remaining API endpoint for user's image uploading

### **What could be improved:**

- Use Server-Sent Events (SSE) instead of polling in notification
- Enhance the backend to sync with the data needed of the frontend
- Responsiveness of our UI
- Time Management

## **What needs to be done:**

- Backlogs from sprint 7:
  - o Modals
- Backlogs from sprint 8:
  - o Admin Layout
- Backlogs from Sprint 9:
  - o Admin Dashboard Page
  - o Admin Item List Page
  - o Manage Item Page
  - o About Us Page
- Proceed to Sprint 9
